To do that, click on the lock icon next to Click the lock to make changes. That should open a dialog box asking you to enter your password.. Open Applications Downloaded from the Internet 1 Go to the Apple icon, and chose System Preferences.. However, sometimes this is just a security issue that can be corrected. Users are seeing warning messages about downloaded applications being damaged and unable to be opened.. By default, Mac OS X security allows only the apps that are downloaded from the Mac App Store (such as iTunes) or from Mac certified developers.. 6 Open the app file that you want to be installed. Instead of the error message, now it will give you a warning telling you that this app is downloaded from the internet and asking would you still like to open it.
