A brief intro to Lightroom CC & Photoshop CC, there are numerous resources online on each of them. I would suggest going through the YouTube tutorials and working through the free trial to get some hands on experience. There are many many video tutorials for these programs, just search them up on YouTube, be sure to subscribe to them so you get notified when the next new one comes out! File format: MOV. (.mov). MOV files are versatile and can be used to play on virtually any computer or portable device including home DVD players, Apple computers,

smartphones and tablets, and many other more. MOV files are smaller than many other video formats so they play faster. While MOV files have a larger file size than some other video formats, they are an accepted format for video on the Web. I purchased a Panasonic GX8 last month (after having owned a Lumix GF5 for 2 years and the GX8 is by far the best camera I've ever used. It's compact size and build quality are outstanding. It is very quick to focus, and the menus and controls are intuitive. The video quality is very good, as long as you're not trying to record a 4K video. 4K video looks very good but is also expensive. The Insta360 One X, as a spherical 360-degree camera, can record stunning 4K video footage, which can be viewed 82157476af
